## PROFESSIONAL SUMMARY

Python full stack developer in training with experience creating responsive UIs and backend APIs using React, Tailwind, Python, Django, and MySQL. I enjoy solving problems, learning fast, and collaborating with others to deliver results. Looking for a full-time opportunity where I can grow professionally and add value to a development team.

---

## WORK EXPERIENCE

### Intern, CodSoft

Sep 2024 - Aug 2024

- Designed and developed three responsive web applications from scratch using HTML5, CSS3, and vanilla JavaScript, ensuring compatibility across modern browsers and mobile devices.
- Collaborated with online communities (GitHub/StackOverflow/etc.) and followed version control (Git) for source management and deployment.

### Python Full Stack Trainee, ARCITE Project Management Trainee

Jun 2025 -Present

- Built a full-stack web application using React.js for frontend UI and Django REST Framework for backend APIs.
  - Developed a single-page application (SPA) using React.js, implementing reusable functional components with hooks (useState, useEffect, etc.).
  - Managed component-level and global state using Context API / Redux (whichever applies).
  - Integrated REST APIs using fetch or axios for dynamic data rendering.
- 

## EDUCATION

### BTech Computer Science

2021-2025

- APJ Abdul Kalam Technological University
  - CGPA: 7.16 (No Backlogs)
- 

## PROJECTS

**Rent A Cart Rental Services Web Application (Full Stack / Django + React):** Implemented user registration, item listings, booking system, and admin management panel. Integrated search, filters, payment/cart flow and status tracking for rentals.

**EMS-Employee Management System (React / HTML+JS):** Implemented CRUD operations, authentication, and role-based access.

**E-Commerce Web Application:** Implemented Admin, user section, Authentication, payment gateway, check out option.

**Movie App (TMDB / Custom API):** Created a movie browsing platform displaying trending, popular, and searchable films.

**Learning Management System:** created a LMS system with payment gateway, student progress tracking and role-based access.

## ADDITIONAL INFORMATION

- **Technical Skills:** HTML, CSS, Java script, React, Python, MySQL, GitHub, Figma, Photoshop
- **Languages:** English, Malayalam
- **Certifications: Awards/Activities:** Web Development Internship Certificate from CodSoft. Trainee experience certificate from ARCITE
